EDUCATION

BAYLOR UNIVERSITY

Master of Business Administration & M.S., Information Systems (Product Management Track)

May 2027

Waco, Texas

- **GPA:** 4.0
- **Coursework:** Strategic Management, Corporate Finance, Marketing Strategy, Business Analytics for Decision Making, Information Systems Analysis & Design, Advanced Python for Analytics, Database Management Systems

OBAFEMI AWOLOWO UNIVERSITY

BSc., Civil Engineering

Dec 2021

Ile-Ife, Nigeria

- **Coursework:** Engineering Analysis, Statistics & Data Analysis, Java Programming, Operations Management, Engineering Economics, Mathematical Methods

PROFESSIONAL EXPERIENCE

DI9ITAL LIMITED

Product Manager

Feb 2025 - Jun 2025

Bristol, UK (Remote)

- Reduced feature rework by 30% (~300 billable hours saved) by leading zero-based workflow redesign, conducting user research, and structured product discovery across 5 concurrent client engagements in ambiguous transformation environments
- Influenced \$80K+ in client contract value by facilitating cross-functional workshops that aligned C-suite stakeholders, clients, and engineering around unified transformation roadmaps and Jira-tracked execution plans
- Reduced engineer onboarding time from two weeks to less than seven days by creating standard product templates and automating workflows, which improved delivery team efficiency

BLUESHIRT INC.

Product Manager

Jul 2022 - Feb 2025

Quezon City, Philippines (Remote)

- Scaled consumer-facing product revenue from \$0 to \$120K+ ARR by launching subscription and payment workflows, building financial models for pricing strategy, and managing end-to-end business operations
- Designed and deployed a machine learning and automation pipeline for government and enterprise clients, automating data extraction across 100,000+ records and eliminating 90% of manual review, saving clients an estimated \$200K+ annually
- Led platform migration from Bubble to Node.js, transferring 10,000+ user accounts and 100K+ records with 99% uptime during a one-month dual-run transition, strengthening technology infrastructure for scale
- Drove 150% improvement in platform speed and doubled monthly active users within six months by writing SQL queries and building Amplitude dashboards that surfaced user behavior patterns, informing feature prioritization and the product roadmap through data-driven experimentation

AZA GLOBAL INC.

Co-Founder

Jan 2022 - Jul 2022

Lagos, Nigeria

- Launched a cross-border fintech product, acquiring 500+ users and processing \$5K+ in transactions within the first month by designing trust-building UX and direct bank transfer payout workflows
- Designed and implemented KYC and anti-fraud workflows to mitigate fraud exposure, ensure regulatory compliance, and establish a scalable risk governance framework

PROJECT

AI Voice Agent for Healthcare Workflow Automation | [xophie.ai](#)

- Built and deployed a 0 to 1 AI-first voice agent using LLM-based reasoning to automate scheduling workflows for dental practices, reducing front-desk call handling time by an estimated 60%
- Led stakeholder interviews with 10+ healthcare practice owners to map scheduling workflows, identify inefficiencies, and define product requirements for an AI-native scheduling system
- Architected scalable voice infrastructure supporting 200+ concurrent sessions while navigating HIPAA compliance and data security requirements, converting technical constraints into a prioritized product roadmap

AI Meeting Notetaker | [xophieai.vercel.app](#)

- Built and actively use an AI-powered meeting assistant in Python that captures live conversations, extracts action items, and generates structured summaries using real-time speech-to-text and LLM pipelines
- Implemented a full-stack system with SQL-backed searchable meeting history and a React dashboard for playback and analytics, streamlining documentation across academic and professional settings

SKILLS

- **Product:** Product Discovery, Roadmapping, Feature Prioritization, Experimentation, Go-to-Market, Cross-functional Collaboration, Regulatory Compliance, Healthcare
- **Data & User Insight:** User Research, UX Design, Product Analytics (Amplitude), Data Analysis (SQL/Python/R), A/B Testing
- **AI & Technical:** LLMs, Agentic Systems, API Design, ML Pipelines, Cloud (AWS, Firebase), Automation, Claude Code
